Introduction

Discuss the need for image and video coding from the point of storage and transmission bandwidth

Discuss:

What is the domain of this work?

What is the problem addressed? Why is this problem important?

Where does this work fit in the big picture? Provide references to related literature.

Outline of the rest of the report

Procedural Section

In this section provide information on what you did – The steps you took in doing the experiment or investigation.

Please provide:

- A complete layered architecture of the system designed
- The functional high level description of each layer and component
- The module(s) you are designing-
- The input/output or communication interface of the module you are designing
- More of you can think of

Results

Summarize your findings:

- Use visual, tables, graphs, and other figures that summarize the data graphically.
- Provide a narrative in a passage to explain the key results.

Conclusion

Briefly discuss what has been achieved. What is the main contribution of this report and what is next?

References
Place all references using the format given below.

[1] S. Kumar, "Video on Demand," Journal or Conference Name, Vol. 18, No. 1, 1988.

Fonts: Please prepare your report using MS Word and embed the all the resulting images, plots and figures. Use the Arial font for titles, and Times New Roman 11-point font for body text.

Diagrams and Tables: Label all diagrams and tables. Any diagrams or tables taken from the Internet or other sources must be referenced at the end of the document.

Footnotes: Footnotes should be inserted on the current page, like this[1]. You can have more than one footnote on the same page, here is an example[2].

Citing Sources

If you copy or simply paraphrase a sentence, or paragraph of text from any source, then this must be acknowledged by using quotation marks and citing the source.

Source Code: **Please upload the .m file separately as explained in coding_**

rules.htm
